

# BSEACD Concerns

## Construction Concerns

---

### ❖ Excavation Impacting Karst Features

- ❖ Has KM estimated the number of Karst Features – voids and caves?
- ❖ What are their construction methods to eliminate potential impacts?
- ❖ Will KM develop a void mitigation plan?

### ❖ Oversight to Pipeline Design and Construction

- ❖ Will they have a Karst expert?
- ❖ Will they notify the Districts?

### ❖ Pipeline Specifications

- ❖ Thickness, double-walled, corrosion protection?

# BSEACD Concerns

## Operations Concerns

---

- ❖ Potential for Liquids in Highly Permeable Rock
  - ❖ What liquids might be in the pipeline and how much could be released if a leak or spill occurs?
- ❖ Connectivity between the Aquifers
  - ❖ What could be the impacts to the Barton Springs and Austin Blind Salamanders?
- ❖ Pipeline Management Plan
  - ❖ Will herbicides be used for vegetation control?
  - ❖ How will they inspect the pipeline and how often?
  - ❖ How will they test the pipeline and how often?
